Backend engineer focused on distributed systems and developer tooling. I like boring infrastructure, fast feedback loops, and code that survives its first production incident.

[EXPERIENCE]

[EXP 01]

2022 — present

Senior Backend Engineer

@ Acme Systems

- Designed and operated a multi-region event pipeline handling 40M messages/day.
- Cut p99 latency of the core API by 60% through query and cache rework.

[EXP 02]

2020 — 2022

Backend Engineer

@ Northwind Labs

- Built billing and metering services from zero to production.
- Introduced contract testing and structured error handling across 12 services.

- Owned on-call for the platform: wrote the runbooks and the postmortems.

Go

PostgreSQL

Redis

Kubernetes

Kafka

Node.js

TypeScript

PostgreSQL

Docker

[EXP 03]

2018 – 2020

Junior Developer

@ Startup 404

- Shipped features for a SaaS dashboard used by 30k users.
- Learned that deleting code is a feature.

JavaScript

Vue

MySQL

[SKILLS]

BACKEND

Go

Node.js

TypeScript

Python

Rust

DATA & INFRA

PostgreSQL

Redis

RabbitMQ

Docker

Kubernetes

Terraform

OBSERVABILITY

OpenTelemetry

Grafana

Loki

Prometheus

FRONTEND & TOOLING

Astro

React

Tailwind

GitHub Actions

Bun

[EDUCATION & LANGUAGES]

[EDU]

2014 — 2018

Ingeniería Informática

Universidad Politécnica

Español Nativo

English C1
